

# RecoverCloud

## Data Protection & Recovery Simple. Affordable.

### Trust **RecoverCloud** to Safeguard Your Business

Companies have relied on tape backups or other internal systems for preserving information for decades. Today, those methods are as past their prime as paper files. They're expensive and unreliable. Failures are common. Security breaches are a threat. Unfortunately, businesses often don't realize the risks they run until the damage has been done. With RecoverCloud by PCS you can guard against threats with a system that will work for your business - one that's easy to manage and suits your budget and business needs.

#### ▶ **Benefits**

#### ▶ **Speed, Reliability, Scalability**

Using Tier 1 backbone providers and multiple gigabits of provisioned bandwidth capacity delivers maximum speed, reliability and virtually unlimited scalability. Increasing data growth is covered with petabyte storage potential on the backend.

#### ▶ **Meeting Compliance Requirements**

Compliance requirements are rapidly changing and often burdensome. Don't worry - we're on top of them all so you don't have to be. Our expert team monitors the relevant criteria for your business environment and deploys solutions accordingly.

## **RecoverCloud** by PCS

- ✓ Predictable Monthly Cost, Scalable Level of Service
- ✓ All-in-one backup solution requires no third-party software, hardware or cloud
- ✓ 24x7x365 Remote Help Desk and On-site Support
- ✓ Accredited Managed Services Provider
- ✓ Experienced, Certified Technicians and Engineers
- ✓ No customer hardware purchase required
- ✓ State-of-the-art Operations Center with Cutting Edge Technology
- ✓ Remote Resolution of Issues more than 90% of the Time
- ✓ Easy to Understand Graphical Reporting of Performance

## Integrated All-in-one Backup Solution

A complete backup solution no longer requires multiple vendors. RecoverCloud by PCS combines software, storage saving de-duplication, and offsite replication. All without per-server or per-application licensing fees.

## Protect Against Problems. Recover Quickly If They Strike

RecoverCloud makes it easy to safeguard your business information. Installation is simple and backups are automatic. Security is uncompromised, with maintenance handled by a dedicated group of professionals. The offsite storage system allows scalability and provides 24/7 file restoration.

## Key Differentiators

### Backup Essentials

It's essential today to implement a multi-faceted backup solution, to ensure full data protection for businesses and for the MSP to confirm its expertise in the solution it chooses to provide. Three backup essentials are:

#### • Image-Based Backup

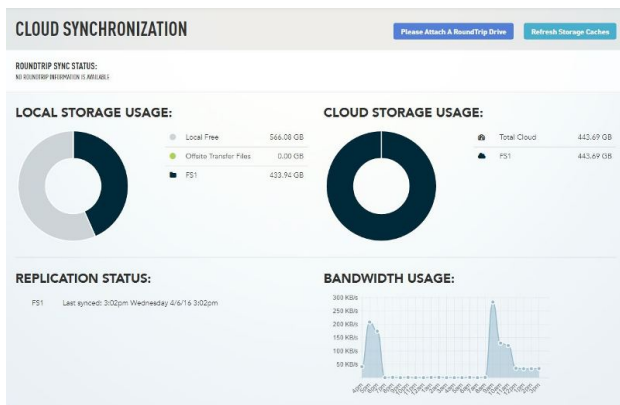

With image-based backup entire systems are backed up, there is no missing that one critical file.

#### • Hybrid Cloud-Based Model

Because tape is a manual process it is fraught with human mishaps, making the validity of the off-site backups questionable. Using instant off-site virtualization in a secure hybrid cloud-based model is the most preferred and reliable.

#### • Testing and Proof of Backup

A must for an essential backup plan is one that includes automated testing and proof of backup. RecoverCloud's Screenshot Backup Verification is a comprehensive and automated way to confirm the validity and content of backups.

## Services

### Data Backup

Windows & Linux

Continually protects desktops, laptops & servers

Data recovery driven by the end user or administrator

Fast, network-speed recovery times

Can restore whole volume or specific files, emails or folders

Brick-level restore of Microsoft Exchange

Microsoft SQL Server support

Custom scheduling

Custom restore intervals for tight recovery point objectives (RPOs)

### Disaster Recovery

Off-site backups according to an automated schedule

Eliminates the hassle of tape archives

Protection from fire, theft, sabotage and natural disasters

Data encrypted at a leading data center

Fully replicated appliance sent overnight if there's a site failure

## About PCS

At Precision Computer Services, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management so that you can select only the services that will benefit your company. The choice is yours.
